

BRAND VALUE ETF (BVAL)

Listed on NYSE Arca, Inc.

www.BrandValueETF.com

Before you invest, you may want to review the Fund's prospectus and statement of additional information ("SAI"), which contain more information about the Fund and its risks. The current prospectus and SAI, each dated January 31, 2019, are incorporated by reference into this Summary Prospectus. You can find the Fund's prospectus, SAI and other information about the Fund online at www.BrandValueETF.com/documents. You can also get this information at no cost by calling 1-800-617-0004 or by sending an e-mail request to ETF@usbank.com.

IMPORTANT NOTE: Beginning on January 31, 2021, paper copies of the Fund's shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the shareholder reports from your financial intermediary, such as a broker-dealer or bank. Instead, the shareholder reports will be made available on a website, and you will be notified by mail each time a report is posted and provided with a website link to access the report.

You may elect to receive all future Fund shareholder reports in paper, free of charge. If you already elected to receive shareholder reports electronically, you will not be affected by this change and you need not take any action. Please contact your financial intermediary to inform them that you wish to continue receiving paper copies of Fund shareholder reports and for details about whether your election to receive reports in paper will apply to all funds held with your financial intermediary.

Investment Objective

The Brand Value ETF (the "Fund") seeks to track the performance, before fees and expenses, of the EQM Brand Value Index (the "Index").

Fees and Expenses of the Fund

This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund ("Shares"). This table and the example below do not include the brokerage commissions that investors may pay on their purchases and sales of Shares.

Annual Fund Operating Expenses (*expenses that you pay each year as a percentage of the value of your investment*)

Management Fees	0.65%
Distribution and/or Service (12b-1) Fees	0.00%
Other Expenses	0.00%
Total Annual Fund Operating Expenses	0.65%

Expense Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your Shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

1 Year	3 Years	5 Years	10 Years
\$66	\$208	\$362	\$810

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund's performance. For the fiscal year ended September 30, 2018, the Fund's portfolio turnover rate was 86% of the average value of its portfolio.

Principal Investment Strategy

The Fund uses a "passive management" (or indexing) approach to track the performance, before fees and expenses, of the Index. The Index was developed in 2018 and is owned by Brandometry, LLC (the "Index Provider"). The Index is designed to identify undervalued publicly-traded U.S. companies based on the value of their brand.

EQM Brand Value Index

The Index measures the performance of up to 50 publicly-traded U.S. companies based on a proprietary analysis of the value of their brand relative to their market capitalization. Companies included in the Index are equally weighted at the time of each annual reconstitution of the Index on the second Wednesday of each September.

Companies eligible for inclusion in the Index are those that (i) have their stock listed on a U.S. exchange, (ii) have a market capitalization of at least \$1 billion, (iii) have had their brand scored by CoreBrand Analytics (“CoreBrand”), a division of Tenet Partners, a leading brand innovation and marketing consulting firm, as of June 30 for each of the two years prior to the reconstitution of the Index, and (iv) have a positive return on invested capital (“ROIC”). ROIC is a company’s net operating profit after tax divided by its average invested capital.

CoreBrand annually surveys approximately 10,000 individuals across the United States representing the investment community, potential business partners, business customers, everyday consumers, and potential consumers regarding company brands. The survey questions are designed to solicit quantitative information regarding each eligible company’s brand based on its **familiarity** (i.e., how aware consumers are of the brand) and **favorability** (i.e., perceptions of the brand’s overall reputation, the company’s management, and the company’s investment potential). The results of the surveys are objectively tabulated, resulting in a “BrandPower” score for each company.

Companies with a BrandPower score of less than 60 (out of a potential score of 100) are removed from the Index universe, and the remaining eligible companies with the largest BrandPower-to-market capitalization ratio, based on their BrandPower score and market capitalization as of June 30 for each of the two prior years, are included in the Index up to a maximum of 50 companies. The Index is expected to be primarily composed of large capitalization companies and to generally include significant exposure to companies in the consumer discretionary sector of the market.

The Fund’s Investment Strategy

The Fund attempts to invest all, or substantially all, of its assets in the securities that make up the Index. Under normal circumstances, at least 80% of the Fund’s total assets (exclusive of any collateral held from securities lending) will be invested in the component securities of the Index. The Fund’s investment adviser expects that, over time, the correlation between the Fund’s performance and that of the Index, before fees and expenses, will be 95% or better.

The Fund will generally use a “replication” strategy to achieve its investment objective, meaning it generally will invest in all of the component securities of the Index in the same approximate proportion as in the Index. However, the Fund may use a “representative sampling” strategy, meaning it may invest in a sample of the securities in the Index whose risk, return and other characteristics closely resemble the risk, return and other characteristics of the Index as a whole, when the Fund’s investment adviser believes it is in the best interests of the Fund (e.g., when replicating the Index involves practical difficulties or substantial costs, an Index constituent becomes temporarily illiquid, unavailable, or less liquid, or as a result of legal restrictions or limitations that apply to the Fund but not to the Index).

The Fund generally may invest up to 20% of its total assets (exclusive of any collateral held from securities lending) in securities or other investments not included in the Index, but which the Fund’s investment adviser believes will help the Fund track the Index. For example, the Fund may invest in securities that are not components of the Index to reflect various corporate actions and other changes to the Index (such as reconstitutions, additions, and deletions).

To the extent the Index concentrates (i.e., holds more than 25% of its total assets) in the securities of a particular industry or group of related industries, the Fund will concentrate its investments to approximately the same extent as the Index.

Principal Investment Risks

You can lose money on your investment in the Fund. The Fund is subject to the risks described below. Some or all of these risks may adversely affect the Fund’s net asset value per share (“NAV”), trading price, yield, total return and/or ability to meet its objectives. For more information about the risks of investing in the Fund, see the section in the Fund’s Prospectus titled “Additional Information About the Fund—Principal Investment Risks.”

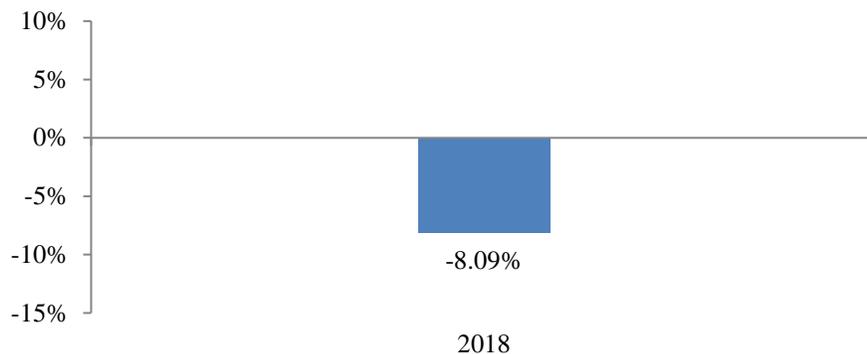

- **Equity Market Risk.** The equity securities held in the Fund’s portfolio may experience sudden, unpredictable drops in value or long periods of decline in value. This may occur because of factors that affect securities markets generally or factors affecting specific issuers, industries, or sectors in which the Fund invests. Common stocks, such as those held by the Fund, are generally exposed to greater risk than other types of securities, such as preferred stock and debt obligations, because common stockholders generally have inferior rights to receive payment from issuers.
- **Models and Data Risk.** The composition of the Index is heavily dependent on proprietary quantitative models as well as information and data supplied by third parties (“Models and Data”). When Models and Data prove to be incorrect or incomplete, any decisions made in reliance thereon may lead to the inclusion or exclusion of securities from the Index universe that would have been excluded or included had the Models and Data been correct and complete. If the composition of the Index reflects such errors, the Fund’s portfolio can be expected to reflect the errors, too.
- **Passive Investment Risk.** The Fund invests in the securities included in, or representative of, its Index regardless of their investment merit. The Fund does not attempt to outperform its Index or take defensive positions in declining markets. As a result, the Fund’s performance may be adversely affected by a general decline in the market segments relating to its Index.
- **Sector Risk.** To the extent the Fund invests more heavily in particular sectors of the economy, its performance will be especially sensitive to developments that significantly affect those sectors.

- *Consumer Discretionary Risk.* The Fund is generally expected to invest significantly in companies in the consumer discretionary sector, and therefore the performance of the Fund could be negatively impacted by events affecting this sector. The success of consumer product manufacturers and retailers is tied closely to the performance of domestic and international economies, interest rates, exchange rates, competition, consumer confidence, changes in demographics and consumer preferences. Companies in the consumer discretionary sector depend heavily on disposable household income and consumer spending, and may be strongly affected by social trends and marketing campaigns. These companies may be subject to severe competition, which may have an adverse impact on their profitability.
- *Consumer Staples Sector Risk.* The Fund may invest in companies in the consumer staples sector, and therefore the performance of the Fund could be negatively impacted by events affecting this sector. Companies in the consumer staples sector, including those in the food and beverage industries, may be affected by general economic conditions, commodity production and pricing, consumer confidence and spending, consumer preferences, interest rates, product cycles, marketing campaigns, competition, and government regulations.
- *Information Technology Sector Risk.* Market or economic factors impacting information technology companies and companies that rely heavily on technological advances could have a significant effect on the value of the Fund's investments. The value of stocks of information technology companies and companies that rely heavily on technology is particularly vulnerable to rapid changes in technology product cycles, rapid product obsolescence, government regulation and competition, both domestically and internationally, including competition from foreign competitors with lower production costs. Stocks of information technology companies and companies that rely heavily on technology, especially those of smaller, less-seasoned companies, tend to be more volatile than the overall market. Information technology companies are heavily dependent on patent and intellectual property rights, the loss or impairment of which may adversely affect profitability.
- **Shares May Trade at Prices Other Than NAV.** As with all ETFs, Shares may be bought and sold in the secondary market at market prices. Although it is expected that the market price of Shares will approximate the Fund's NAV, there may be times when the market price of Shares is more than the NAV intra-day (premium) or less than the NAV intra-day (discount) due to supply and demand of Shares or during periods of market volatility. This risk is heightened in times of market volatility, periods of steep market declines, and periods when there is limited trading activity for Shares in the secondary market, in which case such premiums or discounts may be significant.
- **Tracking Error Risk.** As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons. For example, the Fund incurs operating expenses and portfolio transaction costs not incurred by the Index. In addition, the Fund may not be fully invested in the securities of the Index at all times or may hold securities not included in the Index.

Performance

The following performance information indicates some of the risks of investing in the Fund. The bar chart shows the Fund's performance for the calendar year ended December 31, 2018. Performance prior to June 1, 2018 reflects the Fund's prior investment objective of seeking to track the performance, before fees and expenses, of the BrandTransact 50[®] Index (the "Prior Index"). The table illustrates how the Fund's average annual returns for the 1-year and since inception periods compare with those of a broad measure of market performance and the Index or Prior Index during the applicable period. The Fund's past performance, before and after taxes, does not necessarily indicate how it will perform in the future. Updated performance information is also available on the Fund's website at www.BrandValueETF.com.

Calendar Year Total Return

During the period of time shown in the bar chart, the Fund's highest quarterly return was 6.13% for the quarter ended September 30, 2018 and the lowest quarterly return was -11.21% for the quarter ended December 31, 2018.

**Average Annual Total Returns
For the Periods Ended December 31, 2018**

	1 Year	Since Inception (6/12/2017)
Brand Value ETF		
Return Before Taxes	-8.09%	-1.76%
Return After Taxes on Distributions	-8.49%	-2.15%
Return After Taxes on Distributions and Sale of Fund Shares	-4.51%	-1.33%
EQM Brand Value Index/BrandTransact 50 Index¹ (reflects no deduction for fees, expenses, or taxes)	-7.62%	-0.84%
Standard & Poor's 500 (S&P 500 Index) (reflects no deduction for fees, expenses, or taxes)	-4.38%	4.06%

¹ Effective June 1, 2018, the Fund's investment objective changed to track the performance, before fees and expenses, of the EQM Brand Value Index. Prior to June 1, 2018, the Fund sought to track the performance, before fees and expenses, of the Prior Index.

After-tax returns are calculated using the historical highest individual federal marginal income tax rates during the period covered by the table above and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. In certain cases, the figure representing "Return After Taxes on Distributions and Sale of Shares" may be higher than the other return figures for the same period. A higher after-tax return results when a capital loss occurs upon redemption and provides an assumed tax deduction that benefits the investor. After-tax returns shown are not relevant to investors who hold their Shares through tax-deferred arrangements such as an individual retirement account ("IRA") or other tax-advantaged accounts.

Management

Investment Adviser

CSat Investment Advisory, L.P., doing business as Exponential ETFs (the "Adviser"), serves as investment adviser to the Fund.

Portfolio Managers

Charles Ragauss, CFA, is Managing Director for the Adviser and has been a portfolio manager for the Fund since its inception in June 2017. Qiao Duan is a Portfolio Manager for the Adviser and has been a portfolio manager for the Fund since January 2019.

Purchase and Sale of Shares

Shares are listed on a national securities exchange, such as NYSE Arca, Inc. (the "Exchange"), and most investors will buy and sell Shares through brokers at market prices, rather than NAV. Because Shares trade at market prices rather than NAV, Shares may trade at a price greater than NAV (premium) or less than NAV (discount).

The Fund issues and redeems Shares at NAV only in large blocks known as "Creation Units," which only Authorized Participants ("APs") (typically, broker-dealers) may purchase or redeem. Creation Units generally consist of 50,000 Shares, though this may change from time to time. The Fund generally issues and redeems Creation Units in exchange for a portfolio of securities closely approximating the holdings of the Fund (the "Deposit Securities") and/or a designated amount of U.S. cash.

Tax Information

Fund distributions are generally taxable as ordinary income, qualified dividend income, or capital gains (or a combination), unless your investment is in an individual retirement account ("IRA") or other tax-advantaged account. Distributions on investments made through tax-deferred arrangements may be taxed later upon withdrawal of assets from those accounts.

Financial Intermediary Compensation

If you purchase Shares through a broker-dealer or other financial intermediary (such as a bank) (an "Intermediary"), the Adviser or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange traded products, including the Fund, or for other activities, such as marketing, educational training or other initiatives related to the sale or promotion of Shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary's website for more information.
